

WERECON Inc.

Distributor Quotation Guide

Decide your ordering method.

You should either select a model from the common models list below, or construct a custom model number using the model number chart. All WERECON models are built to order, so your choice in this step will not affect your lead time.

Common Model Numbers

W1: W1-1000, W1-2000, W1-3000
W2: W2-1000, W2-2000, W3-3000
W3: W3-4000, W3-6000, W3-7000, W3-9000
W4: W4-6000, W4-7400
W6: W6-4004, W6-7004
W7: W7-000A, W7-700A, W7-900A
W9: W9-BB00, W9-BBB0

Model Number Chart

Using the Model Number Chart, you can construct a model that exactly meets your customers needs. Follow the guidelines on the model number chart.

Select Tanks

Select bulk storage tanks meeting the needs of your customer and matching the requirements of the system. Most pumps require a bulk storage tank, but the 1,2 and 3 series pumps can be either wall or tank mounted (please specify on your order) Wall mount pumps are for use with standard storage drums.

Add a Flow Sensor if Necessary

WERECON systems all require a flow sensor. Sensors are supplied with W1/W2 Series units, but should be ordered for all other models if the pump station does not already have a data industrial compatible flow sensor.

Price Your System

Look up the above components on the distributor price list.
