

Signature Service Plan

General Description:

The Signature Service plan is ideal for owners of WERECON water treatment systems. It offers the regular monthly service your pH control system requires to run safely and reliably. Additionally, the plan includes two more service calls per year, which are helpful when problems arise with your fertigation system. With our guaranteed 72 hour response time, these two visits can be used however you see fit. When it comes to making your system operate at peak performance, nobody can out perform the people who designed it.

Features:

- One complete service call per month including pH sensor calibration, cleaning of sample lines, a thorough 27 point inspection of all pH and fertigation related components, and any additional work required bring the system back to factory spec.
- Two new pH sensors per year.
- Two additional service calls to be used at your discretion during the contract period.
- A monthly service report will be provided detailing system efficiency and all work performed on the system.
- Preferred labor rate during the contract period for any labor required outside of that included in the base contract. (\$65.00/hr vs. \$85.00/hr).
- Five percent discount on all non-warranty parts purchased during the contract term.
- Free phone support.
- Free software upgrades.
- 72 hour guaranteed response.
